Deployment end user requires Macromedia Flash plug-in version 7

Your Business Data. Visualized.

Markets are so competitive these days – and resources so tight – it sometimes seems you need a crystal ball to lead your company on a steady and profitable course. Organizations have invested heavily in technology to gather data about their business, yet people often struggle to make sense of the numbers quickly to make fast, accurate decisions, and stay ahead of competition. Combining personal and corporate data into intuitive visual presentations is difficult. Modeling the future performance of the business through “what-if” analyses is often left to statisticians who are disconnected from the front-lines of where you need to make your decisions and drive performance.

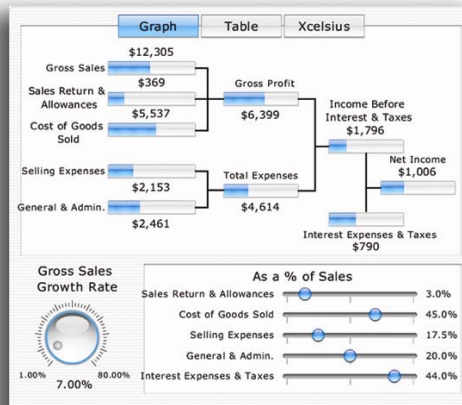

All that has changed with Crystal Xcelsius™ Workgroup, which provides everything you need to create stunning, interactive visual analytics that connect to Excel spreadsheets or any external data source using web services or XML. Your team can then share these analytics “live” within PowerPoint, PDF, Outlook, and the web.

Create interactive visual analytics with point-and-click connectivity to personal and corporate data.

Stunning Information Visualization

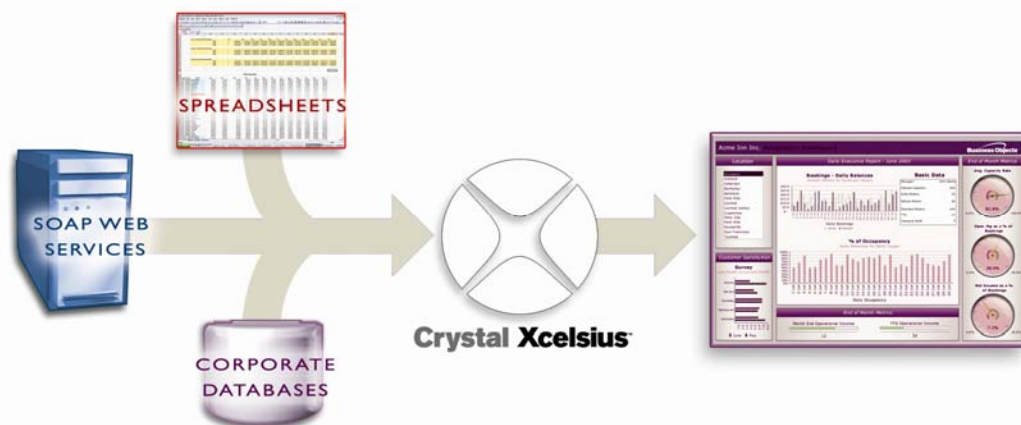

Your team has a job to do: get everyone's attention with stunning interactive visual analytics that gets your point across and lets them know you mean business. Crystal Xcelsius Workgroup lets you easily transform ordinary Excel spreadsheets into engaging visual models reflecting your business data. You can choose from numerous pre-built visual components such as charts, maps, skins, and more. This means you can develop and deploy sophisticated interactive visual analytics for your workgroup in days instead of weeks.

Financial visual analytics show the impact of varying expense and revenue ratios on net income.

Connected to Your Personal and Corporate Data

Crystal Xcelsius Workgroup lets you create interactive visual analytics from personal or corporate data with point-and-click ease. Flexible data access using Excel or SOAP-based web services means your analytics are live – with up-to-the-minute information. Best of all, Crystal Xcelsius Workgroup is designed with the end user in mind. Rapid development and deployment is achieved with a template-driven architecture and Excel-based foundation so you can serve your own visual interactive analytic needs.

Connect to a variety of data sources and create stunning visual interactive analytics that can be integrated “live” into PowerPoint, PDF, and the web with one click of the mouse.

Interactive Visual Analytics

Knowing how your business is performing today is great, but what if something changes? For example, do you know how profits are impacted by the price of raw materials? What if you increase headcount in the Asia-Pacific region to take advantage of growth opportunities? Crystal Xcelsius Workgroup helps you answer these and other questions quickly and easily through interactive visual analytics with graphical sliders, gauges, filters, and numerical input tools. Engage and enlighten your audience with intuitive and interactive displays that let you explore different outcomes with visual, what-if analyses to gain deeper insight and reach final decisions faster – all with the click of a mouse.

Easy Distribution to Your Workgroup

Unlock the power of information to others on your team. With Crystal Xcelsius Workgroup you can easily distribute live interactive visual analytics in Microsoft PowerPoint, Outlook, and PDF so users have easy access to real-time data to gain deeper insight. Moreover, you can deliver analytics as visual calculators and dynamic productivity tools over the web, intranets, or portals – any environment that supports Macromedia Flash.

Revenue Forecast – show the impact of individual product or service lines on total revenue.

Flexible Deployment Options

Crystal Xcelsius Workgroup licensing is flexible enough to meet your business requirements. And Business Objects offers a starter kit that is ideal for a small workgroup, as well as many other options.

The Best Choice on the Market Today

Crystal Xcelsius Workgroup provides interactive visual analytics to present data in a more engaging way through PowerPoint, PDF, Outlook, and the web. To learn more about Crystal Xcelsius Workgroup or other Business Objects products visit our website at www.businessobjects.com.
